File Actions Edit View Help  
Then use path/to/venv/bin/python and path/to/venv/bin/pip. Make  
sure you have pypy3-venv installed.  
If you wish to install a non-Kali-packaged Python application,  
it may be easiest to use pipx install xyz, which will manage a  
virtual environment for you. Make sure you have pipx installed.  
For more information, refer to the following:  
* https://www.kali.org/docs/general-use/python3-external-packages/  
* /usr/share/doc/python3.13/README.venv  
  
note: If you believe this is a mistake, please contact your Python installation or OS distribution provider. You can override this, at the risk of br  
eaking your Python installation or OS, by passing --break-system-packages.  
hint: See PEP 668 for the detailed specification.  
  
(jackal@kali)~  
$ sudo apt update  
Get:1 http://kali.download/kali kali-rolling InRelease [41.5 kB]  
Get:2 http://kali.download/kali kali-rolling/main arm64 Packages [21.1 MB]  
Get:3 http://kali.download/kali kali-rolling/main arm64 Contents (deb) [50.8 MB]  
Get:4 http://kali.download/kali kali-rolling/non-free arm64 Packages [153 kB]  
Get:5 http://kali.download/kali kali-rolling/non-free arm64 Contents (deb) [862 kB]  
Get:6 http://kali.download/kali kali-rolling/contrib arm64 Packages [104 kB]  
Get:7 http://kali.download/kali kali-rolling/contrib arm64 Contents (deb) [245 kB]  
Fetched 73.3 MB in 34s (2,175 kB/s)  
363 packages can be upgraded. Run 'apt list --upgradable' to see them.  
  
(jackal@kali)~  
$ sudo apt install python3-shodan  
python3-shodan is already the newest version (1.31.0-1).  
python3-shodan set to manually installed.  
The following packages were automatically installed and are no longer required:  
  libgdata-common libhdf4-0-alt libsoup-2.4-1 libvpx9 python3-pyinstaller-hooks-contrib python3-zapv2  
  libgdata22 libqt5ct-common1.8 libsoup2.4-common python3-packaging-whl python3-wheel-whl  
Use 'sudo apt autoremove' to remove them.  
  
Summary:  
Upgrading: 0, Installing: 0, Removing: 0, Not Upgrading: 363
